Ra lives on Maat. Ra has a son and a daughter, Shu and Tefnut, Ankh and Maat, life and truth. Ra lives Maat. He lived truth, the truth in book of Thoth. Ra recognizes his corpse [dead body of the letter of Science], gives pulse to his heart, grasps his ba and upholds his ka. And the sons of horus [who brought the corpse, heart, ba and ka of the deceased one], work with Maati [Neith, Selket, Nephthys and Isis], they too lived truth, lived Maati, the truth in book of Thoth, spiritual laws in Pyramid and Coffin Texts.

Mary Baker Eddy wrote of discovering Christian Science in 1866, the operation of divine law—that there is a science to Christian healing, principles that can be understood, taught, and practiced. She described her discovery as a falling apple moment comparable to Isaac Newton's discovery of the law of gravity. Just as Newton explained his scientific theories, Eddy explained hers in her book, *Science and Health with Key to the Scriptures*.

"To those natural Christian Scientists, the ancient worthies, and to Christ Jesus," she said in her book, "God certainly revealed the spirit of Christian Science, if not the absolute letter". She had doubt whether their healing is based on knowledge of absolute letter or divine law or not. The world knows now presumably the law and the Spirit of scientific healing acquired by "ancient worthies", by ancient Egyptian practitioners, Initiated Ones [the way of salvation and science of healing depicted on Pyramid and Coffins Texts], by Assyrian, Greece, Roman Temple Priests.
